

VIVA+

AI VOICE INTEGRATED VIRTUAL ASSISTANT

WHAT IS VIVA+?

VIVA+ is Percipia's all-in-one solution, developed in collaboration with Amazon. This innovative system combines essential hotel technologies, like calling capabilities and system integration.

With VIVA+, guests can easily use voice commands or touch controls to make calls, access hotel services and amenities, and manage a personalized voicemail box. Your property can now offer a seamless, enhanced in-room experience via a sleek Echo Show device.

FAQs:

Q: How can VIVA+ help promote my property's services and amenities?

A: Before deployment, the Percipia team will work with hotel staff to add property services and amenities to the VIVA+ system. After deployment, property staff can easily update, add, or remove these features via the Content Management System or by contacting Percipia's 24/7/365 helpdesk.

Q: How can you customize VIVA+?

A: VIVA+ has customizable skills. Your property can select and activate voice commands that will be relevant to the services and amenities offered. The screen menu is also customizable to your brand.

Q: Is Alexa always recording conversations?

A: No. Alexa Echo Show devices are designed to detect a chosen wake word by default. (e.g. "Alexa"). You have the ability to turn off the microphone.

CMS SPECS:

EXTRAORDINARY GUEST EXPERIENCE

VIVA+ is an innovative hospitality solution developed by Percipia and powered by Amazon's Alexa Smart Properties Hospitality. It integrates Percipia's IP telephone system and guestroom voicemail systems, **Frequency PBX** and **Precision VM**, all through the **Parallax** middleware engine.

Additionally, VIVA+ connects multiple third-party systems, making it easy for guests to order room service, request valet, or book spa treatments. By syncing guest information from property management systems with telephony, VIVA+ ensures a personalized guest experience, showcasing the future of hospitality technology.
